

# Capture Data AUTO POPULATE TEXT

Versatile Solutions for a wide range of industries:

Security | Financial | Automotive  
| Hospitality | Recycling and more...

*idScan*<sup>®</sup> is capable of scanning and extracting data from the following documents:

Workflow Optimization

## Features

- ▶ Choice of extracting the card's image and text, or just the card's image.\*
- ▶ Data is imported to appropriate text fields.
- ▶ Ability to read driver's licenses from all 50 states and over 80 countries around the world.
- ▶ Automatic card detection - just insert a card to begin the scanning process.
- ▶ Image auto alignment - automatically corrects incorrect card insertion.
- ▶ Integrate with 3rd party applications. CSSN has an SDK kit available for integrators.

## Benefits:

- ▶ Increased efficiency, reduced human error.
- ▶ Expedited customer processing.
- ▶ Electronically store the full driver's license, signature, and/or cropped image for future reference.

## Scanners

*idScan*<sup>®</sup> for driver license comes with a choice of high quality, twain compatible color scanners, ranging from A6 to A4, with a resolution of 600 DPI. A magnetic strip reader is also available. All scanners connect to the computer's USB port thus requiring no external power supply, and have small footprint.

## Developers

*idScan*<sup>®</sup> for driver license is available to developers with our standard *idScan*<sup>®</sup> utility (illustrated in the screenshot) as well as with our powerful SDK tools with support for C++, Visual Basic and many other programming tools and languages.

\* Depends on software: Id Scan OCR extracts both the image and text. Id Scan extracts the image only.
