**idScan®**

**Capture Data**

**AUTO POPULATE TEXT**

**Versatile Solutions for a wide range of industries:**

- Security
- Financial
- Automotive
- Hospitality
- Recycling and more...

**idScan®** is capable of scanning and extracting data from the following documents:

- Passports
- Driver’s Licenses and ID
- Medical Cards
- Networking Solutions
- OCR
- Optical Character Recognition
- Kiosk
- Business Cards
- Checks
- Faxes and Forms
- Workflow Optimization

**Features**

- Choice of extracting the card’s image and text, or just the card’s image. *
- Data is imported to appropriate text fields.
- Ability to read driver’s licenses from all 50 states and over 80 countries around the world.
- Automatic card detection – just insert a card to begin the scanning process.
- Image auto alignment – automatically corrects incorrect card insertion.
- Integrate with 3rd party applications. CSSN has an SDK kit available for integrators.

**Benefits:**

- Increased efficiency, reduced human error.
- Expedited customer processing.
- Electronically store the full driver’s license, signature, and/or cropped image for future reference.

**Scanners**

idScan® for driver license comes with a choice of high quality, twain compatible color scanners, ranging from A6 to A4, with a resolution of 600 DPI. A magnetic strip reader is also available. All scanners connect to the computer’s USB port thus requiring no external power supply, and have small footprint.

**Developers**

idScan® for driver license is available to developers with our standard idScan® utility (illustrated in the screenshot) as well as with our powerful SDK tools with support for C++, Visual Basic and many other programming tools and languages.

* Depends on software: Id Scan OCR extracts both the image and text. Id Scan extracts the image only.
