

Capture Data AUTO POPULATE TEXT

Versatile Solutions for a wide range of industries:

Security | Financial | Automotive
| Hospitality | Recycling and more...

idScan® is capable of scanning and extracting data from the following documents:

Workflow Optimization

- ### Features
- ▶ Choice of extracting the card's image and text, or just the card's image.*
 - ▶ Data is imported to appropriate text fields.
 - ▶ Ability to read driver's licenses from all 50 states and over 80 countries around the world.
 - ▶ Automatic card detection - just insert a card to begin the scanning process.
 - ▶ Image auto alignment - automatically corrects incorrect card insertion.
 - ▶ Integrate with 3rd party applications. CSSN has an SDK kit available for integrators.
- ### Benefits:
- ▶ Increased efficiency, reduced human error.
 - ▶ Expedited customer processing.
 - ▶ Electronically store the full driver's license, signature, and/or cropped image for future reference.

Scanners

idScan® for driver license comes with a choice of high quality, twain compatible color scanners, ranging from A6 to A4, with a resolution of 600 DPI. A magnetic strip reader is also available. All scanners connect to the computer's USB port thus requiring no external power supply, and have small footprint.

Developers

idScan® for driver license is available to developers with our standard *idScan*® utility (illustrated in the screenshot) as well as with our powerful SDK tools with support for C++, Visual Basic and many other programming tools and languages.

* Depends on software: Id Scan OCR extracts both the image and text. Id Scan extracts the image only.
