

MedicScan OCR

Transforming the front office of patient care facilities

MedicScan OCR is an easy-to-use scanning system that automates and speeds up the process of transferring data and images from medical cards into electronic forms. It increases productivity and reduces human error by automating the archiving process.

MedicScan OCR quickly and accurately captures the image of medical insurance cards from both sides of the card, extracts the card's text information, and presents it in text format. The captured image and text can be attached to the patient's electronic chart, saved to a file, exported to any other application, emailed, and sent to an FTP or web address.

Scanner

MedicScan OCR comes with a twain compatible A6 color scanner, with a resolution of 600 DPI. The scanner connects to the computer's USB port thus requiring no external power supply, and has small footprint.

Ease of use

Using is easy: Just insert the card into the scanner and watch how **MedicScan OCR** does all the rest! In a matter of seconds, your medical card is scanned, and the image and text data are ready to be saved to a file, exported to various applications such as a database, MS Word and Excel, etc., as well as emailed or sent by FTP and the web b.

Features

- Fully automated scanning process**
 Allows users to focus on chain-feeding media into the scanner, while image processing and data extraction take place automatically in the background.
- Automatic page-feed detection-**
 Launches the scan job immediately upon the insertion of a document into the scanner.
- Documents image and data are stored locally or exported automatically.
- Extensive export capabilities**
 Export to any other application, email, FTP and the web
- Image auto alignment**
 Automatically corrects incorrect card insertion.
- Capable of scanning any photo media including paper photos, ID cards, Passports, checks and even rigid plastic credit cards.
- Automatic data extraction**
 Data is automatically extracted into appropriate text fields.
