

Magnetic Reader

idScan magnetic reader reads magnetic stripes of driver licenses, and extracts the data into an external file or the clipboard. With a reading and processing speed of 1-2 seconds per ID card, idScan's magnetic reader is the ideal solution for customer service offices and counters.

The magnetic reader starts analyzing the data on the magnetic strip automatically as soon as the driver's license is swiped, and saves the data to a text file or the clipboard.

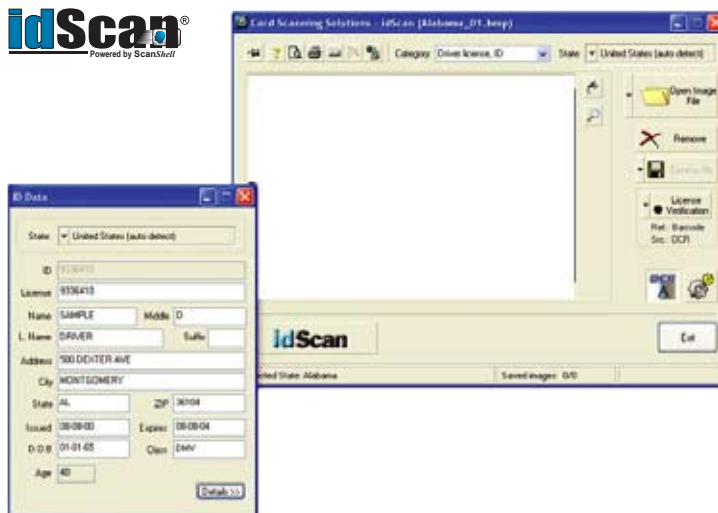

Full automation of the process allows you to chain-feed media into the MagShell 900 reader, while the processing takes place in the background.

Magshell 900 reader

The MagShell 900 reader is capable of reading any AAMVA and ISO compliant driver's license with a magnetic strip. The reader connects to the computer's USB port thus requiring no external power supply, and has very small

Features

- **Fully automated swiping process**
Allows users to focus on chain-feeding media into the reader, while processing and data extraction take place automatically in the background
- **Automatic page-feed detection**
Launches the swipe job immediately upon swiping a document into the scanner
- Data is stored locally or exported automatically
- **Extensive export capabilities:**
export to any other application, email, FTP and the web
- Data is automatically extracted into appropriate text fields
