

How to install **DYMO** LabelWriter **450** Turbo to work with ScanShell.NET

1. Install the latest ScanShell.Net from:
http://id-reader.com/ftp/applications/scanshell_net/scanshell_net.exe
2. Download and install DYMO installation
<http://download.dymo.com/download%20drivers/Software%20for%20DYMO%20LabelWriter/Downloads/1/DLS8Setup.8.2.2.996.exe> and during the install select only the driver and not the software.
3. Download and install this setup: http://www.dymo.com/media/Software/DLS611_full.exe
During the setup when you are prompted to connect your printer click cancel and complete the setup.

This should make the DYMO LabelWriter 450 Turbo work with ScanShell.Net
