

A tablet with LCD screen on which the signature is displayed in real-time. In this way, a writing sensation as on a sheet of paper is achieved.

Also includes a pressure-sensitive pen for input, which allows you to easily capture handwritten signatures and attach them to documents in various applications, as well as email them or send them to an FTP or web address. Includes a cordless, battery-free pen.

Bundled software

WordShell and PDFShell allow created documents to be electronically and biometrically signed using an SigniShell® LCD.

Once the signatures are verified against the SigniShell® Server containing the pre-enrolled signature profiles, the documents are protected from unauthorized modifications.

Scanner Specification

- **Interface:** serial (RS-232), USB
- **Optical Resolution:** Up to 900 dpi*
- **Sampling rate:** up to 400 samples / second*
- **Positioning aid:** LCD Display
- **Drivers:** Microsoft Win 98 SE, Win ME, Win NT4 (SP3 onwards), Win 2000, Win XP
- **Data transmission:** Open protocol with check sum

Features

- USB interface, no external power required

Dimensions

- L x W x H: 5.9" x 6.69" x 0.79"
- Weight: 11.5 oz
- Cable length: 71"

System Requirements

- Microsoft Win 98 SE, Win ME,
- Win NT4 (SP3 onwards), Win 2000, Win XP
