Card Scanning Solutions Announces 64-Bit Support By CSSN OCR SDK, Advancing The Capabilities Of Software Scanning Solutions

CSSN Inc. dba Card Scanning Solutions recently announced the much awaited OCR SDK 64-bit support. With this new development, CSSN's SDK tools are now compatible with 64-bit applications running on Windows 7, Vista and XP. This latest enhancement increases the flexibility of ID card reading and processing by enabling the seamless integration of CSSN's library of Driver's License OCR SDK with 64-bit applications.

Los Angeles, CA (PRWEB) December 29, 2011 -- Card Scanning Solutions (CSSN Inc.) is a leading developer of card reader systems which uses advanced Optical Character Recognition (OCR) technology. CSSN recently announced the full support of their OCR Software Developer Kit (SDK) for 64-bit applications. This means that CSSN's OCR SDK is compatible with 64-bit applications running on Windows 7, Vista and XP. This development enhances the flexibility and the reach of CSSN's state-of-the-art card scanning solutions which are able to quickly and accurately extract data from personal ID cards such as driver licenses, medical insurance cards and other ID cards.

In order to maximize the usability of their card scanning technology, CSSN offers an easy to use Software Developers Kit (SDK), which consists of a set of integrable files such as, dynamic libraries and objects, API documents and code samples, that communicates quickly with any database application. With CSSN's comprehensive SDK, integrators are able incorporate this reading technology directly into their existing software application. The OCR SDK provides a wide variety of sample programming languages and CSSN's library of Driver's License OCR SDK are now fully compatible with 64-bit applications making it a flexible solution in a wide variety of industries.

"Advanced application and system demands have resulted in a demand for 64-bit solutions. At CSSN we understand this advancement of applications today and our goal is to provide our customers with advanced and efficient solutions that meet these expectations. In order to do this we have ensured that our card scanning solutions can be seamlessly integrated with 64-bit applications," said Yossi Zekri, President and CEO of Card Scanning Solutions

CSSN offers a range of driver' license scanning solutions including the IdScan® and ScanShell.net® products which are fully supported by true 64 applications. IdScan® is an easy-to-use id scanner modular application which is capable of scanning a variety of personal cards such as driver licenses ID cards, medical insurance cards, passports, visit cards and more. The IdScan® SDK can read magnetic strips, OCR and 2D Barcodes (PDF417). ScanShell.net® is a powerful modular package that also scans a variety of personal cards. ScanShell.Net® OCR Driver License Scanner is available with CSSN's powerful SDK tools at no extra charge, with support for C++, Visual Basic and many other programming tools and languages. A single integration which fits to a wide range of cards and scanning devices enables users the flexibility to choose the most suitable for their needs and budget. CSSN's solutions are also the only driver license card reading system that reads driver licenses and ID cards of all 50 US states and cards from over 80 countries in the world.

CSSN has always been capable of barcode and magnetic stripe reading but with the 64-bit application support, these solutions offer a wider reach and added flexibility into environments that use these applications. By integrating CSSN's advanced technological solutions into a wide variety of software offerings, you are able to

increase the efficiency and processes in a vast range of industries such as Medical, Finance, Security, and Automotive. The new 64-bit support by the OCR SDK adds to the availability and benefits of the CSSN solutions giving you a competitive edge in your industry

Additional information on the image processing solutions offered by CSSN, Inc. can be found at www.card-reader.com.

Since 1999, Card Scanning Solutions (CSSN Inc.) has been a leading developer of card reading and image processing technologies. They are renowned for developing an OCR engine that can read the driver licenses and ID's from all 50 states and over 80 countries. CSSN Inc. offers valuable solutions that significantly increase productivity, save time and money and result in greater efficiency in a wide variety of industries including Medical, Financial, Hospitality, Security and more.
