

MedicScan® by Card Scanning Solutions to Exhibit at the HIMSS 2010 Conference in Atlanta

MedicScan® by Card Scanning Solutions will exhibit at Booth 9032 during the HIMSS 2010 Conference in Atlanta. Last year they launched several cutting-edge technologies. The year of 2010 is no different with even better and more powerful solutions.

Culver City, CA (Vocus) March 1, 2010 -- [Card Scanning Solutions](#), CSSN Inc., a developer of image processing solutions will be exhibiting its premier product for the medical industry, MedicScan®. The annual HIMSS conference will be in Atlanta, GA at the Georgia World Congress Center. Step into booth 9032 where audience will see MedicScan® True Parse and see a medical [insurance card scanned](#). The information from the card will be automatically populated via OCR (Optical Character Recognition) into designated fields of a patient registration application and billing system.

CSSN Inc. will also be displaying the Snapshell® IDR, the leading image processing hardware solution. The Snapshell® units consist of a high resolution digital camera encased in a small footprint scanner. It snaps an image in seconds and is low-maintenance with no moving parts and does not need calibration. For those looking for a [duplex scanning](#) solution, CSSN Inc. introduces icScan, a one button solution that captures both sides of a medical card in a matter of seconds. icScan can be used with or without a computer depending on your needs.

State-of-the-art technological solutions have always been the strength of CSSN Inc. Last year they introduced IPScan, a remote scanner management application. With IPScan any TWAIN compliant remote scanner can be managed remotely over the network whether it is connected to a thin client terminal or desktop PC. Not to be outdone in 2010 coming soon is WebScan, an ActiveX remote scanner management application. Like IPScan, any TWAIN compliant remote scanner can be managed remotely over the web.

All CSSN Inc. software and hardware solutions are TWAIN compliant. Any application that works with this requirement can be easily installed and utilized. CSSN Inc. also offers a robust SDK for integration and offer high level support.

About HIMSS

“The Healthcare Information and Management Systems Society (HIMSS) is a comprehensive healthcare-stakeholder membership organization exclusively focused on providing global leadership for the optimal use of information (IT) and management systems for the betterment of healthcare.” (<http://himss.org/ASP/index.asp>) CSSN Inc. has been a proud gold member over the last two years.

About CSSN Inc.

CSSN Inc. dba [Card Scanning Solutions](#) has been a developer of image processing technologies for the past decade. Their solutions process data from Driver Licenses, ID's, Business Cards, Passports, Checks, and Medical cards. Using a cutting-edge Optical Character Recognition (OCR) engine, the software reads actual text. A variety of software and hardware solutions are offered that fit the needs of various industries such as healthcare, finance, and security.
