

Data Strategies Offers Medicscan OCR Technology for Patient Registration with Version 6.1

MDSuite, an EMR designed to optimize real-world clinical flows designed by physicians is now utilizing Medicscan OCR technology for patient registration. With Medicscan, MDSuite users register patients with the capture of Medical Insurance Cards, Driver Licenses, and ID's to automatically populate patient registration pages.

Los Angeles, CA ([PRWEB](#)) May 04, 2011 -- Data Strategies, Inc., (DSI) a leading provider of integrated healthcare software announces a strategic partnership with Card Scanning Solutions (CSSN Inc.). Data Strategies' MDSuite integration with CSSN's Medicscan® software streamlines the patient registration process. Scanning driver licenses and insurance cards is proven to drastically reduce data entry errors, saving time and money.

CSSN's Medicscan® software uses [optical character recognition](#) (OCR) True Parse to instantaneously detect, import, and populate fields in MDSuite, e.g., policy numbers, driver's license numbers, and addresses. The scanning process takes only seconds and eliminates time spent on data entry and photocopying medical insurance and ID cards.

Two CSSN hardware technologies are now integrated into DSI's well-established MDSuite - Snapshell® IDR camera reader and Scanshell® 800DX duplex [insurance card scanner](#). Snapshell® IDR takes a photograph of card sized mediums in seconds while Scanshell® 800DX offers duplex scanning, both sides of the document is scanned at once. In either case, scanned data is automatically displayed and available for insertion into MDSuite.

“Our streamlined integration of Medicscan® can save practices time and money by providing fast, accurate, and clear images automatically imported into MDSuite”, said Data Strategies' CEO Les Jacobs. [Patient registration](#) is easily done allowing front desk personnel to spend less time on data entry and having more time for valuable patient care.

About Data Strategies, Inc.

Data Strategies, Inc. (“DSI”) was founded in 1981 by Les Jacobs, the company's current CEO. DSI has been a leader since then, providing billing and practice management solutions to thousands of providers, nationwide. DSI was among the very first companies to ever submit claims electronically and to offer electronic remittance. Throughout its history, DSI has met all electronic claims requirements well in advance of their due date. With the release and certification of DSI's EHR, providers can now purchase a solid, complete, homogenous solution from one company. Data Strategies has almost a 30 year track record of providing quality software, support and implementations – all of which have been keys to the company's success.
