Card Scanning Solutions Partners With Citrix®, ScanShell® Scanner Series Verified By Citrix® As Citrix Ready®

CSSN Inc. dba Card Scanning Solutions has announced their recent partnership with Citrix®. The ScanShell® scanner series from CSSN has now been certified by Citrix® as Citrix Ready® which means that customers with Citrix® deployments can purchase CSSN scanners with confidence. Both existing and new customers in the health care and financial industries, who are running their applications in the Citrix® environment, now have access to state-of-the-art solutions from CSSN.

Los Angeles, CA (PRWEB) December 21, 2011 -- Card Scanning Solutions is a leading software company specializing in image processing and OCR (Optical Character Recognition). CSSN's ScanShell® hardware offers a multipurpose card scanning system for business cards, checks, medical cards, ID cards, driver licenses and passports through a range of high quality image processing scanners. Each scanner in the ScanShell® series brings a unique combination of high-speed, quality scanning with no need for external power supplies. The innovative geometric design of the scanners features a small footprint making it the ideal solution in a wide variety of industries such as Health, Financial, Hospitality and more.

Citrix® is a multinational corporation founded in 1989. They provide server and desktop virtualization, networking, software-as-a-service (SaaS), and cloud computing technologies, including Xen open source products. Citrix® technology offers flexibility and the freedom to work anywhere and anytime. With their advanced technologies, Citrix® has transformed the way business is done. Today, more than 230,000 enterprises rely on Citrix® virtualization, networking and cloud solutions to deliver over 100 million corporate desktops and to touch 75 percent of internet users each day. The line between work and home is easily dissolved with the Citrix® technology enabling individuals, IT organizations and businesses the ability to work anywhere in the world.

CSSN are now partners with Citrix® who have verified the series of ScanShell® scanners as Citrix Ready®. This partnership means that customers with Citrix® deployments can purchase a ScanShell® scanner with confidence that the technology will definitely work in a Citrix® environment. The wide range of ScanShell® scanners and their unique features also provides Citrix® customers with a choice of hardware based on one's specific requirements. The Citrix Ready® program makes it easy for customers to identify complementary products and solutions that can enhance Citrix® environments. With CSSN's comprehensive OCR SDK (Software Developer Kit), Citrix® has been able to easily incorporate CSSN's technology directly into their existing applications. Customers can be confident that the ScanShell® hardware has successfully passed a series of tests established by Citrix®, and can be trusted to work effectively with XenApp™.

The ScanShell® scanners serve as a multipurpose card scanning system for a wide range of cards. These include checks, medical cards, ID cards, driver licenses, passports and business card scanners. The ScanShell® devices are also available in simplex or duplex capabilities. This means that the simplex devices scan one side at a time whereas a duplex scanner scans both sides at the same time. Furthermore, there is the option of A6 or A4 sizes which gives users the option to scan up to 8.5" x 14" sized documents. The ScanShell® scanners need no warm-up and wait time, putting efficient scanning at your fingertips.

The ScanShell® 800R/ 800NR/ 800DX/ 800DXN/ 2000R/ 2000NR/ 3100D/ 3100DN/ 1000A/ 1000N-A

scanners are verified to be compatible with the XenApp™ Citrix product which means that a ScanShell® scanner is the perfect answer to your scanning requirements across the web or even "The Cloud". With the Citrix® stamp of approval, building enterprise data capturing solutions on the flexible Citrix® platforms is truly possible.
