

Got Scanner? Card Scanning Solutions Offers a Variety of Software Only Solutions to Satisfy Image Processing Needs

Card Scanning Solutions introduces a new software line of products – ID and medical scanning software compatible with existing TWAIN compliant scanners.

Los Angeles, CA (Vocus/PRWEB) March 18, 2011 -- Card Scanning Solutions (CSSN Inc.), a premier image processing and [OCR Software](#) Company, recently announced that they have enhanced their wide range of [scanning software](#) solutions to be compatible with all TWAIN compliant USB scanners. This capability provides industries with the flexibility and convenience of utilizing their existing scanners with the state-of-the-art CSSN software.

Yossi Zekri, President and CEO of Card Scanning Solutions said, “By offering scanning systems which are compatible with existing TWAIN compliant USB scanners, we have increased the availability and functionality of our software solutions. Our customers can benefit from CSSN cutting edge scanning technology without the need to purchase additional hardware. Thus, improving ROI through reduction of additional hardware costs and support, while maintaining efficiency and a competitive edge in their industry.”

The software developed by CSSN Inc. combines extensive OCR (Optical Character Recognition) technology that includes barcode and magnetic card data reading solutions. Many of the software solutions provide database capabilities for the processing of any printed media such as driver licenses, ID cards, checks and more. This data can then be sorted, exported and archived into a variety of applications. With this technology, CSSN Inc. has contributed effective solutions to a variety of industries and includes scanning systems such as MedicScan® which is the flagship software solution for the medical industry and IDScan which is a powerful modular package that scans a variety of personal identity cards that offers image processing technology to industries such as Security, Finance, and Automotive.

Additional information on the scanning solutions offered by CSSN Inc. can be found at www.card-reader.com.

About Card Scanning Solutions (CSSN Inc.)

Card Scanning Solutions (CSSN) is a leading developer of image processing technologies since 1999. The company is renowned for having developed the best Driver’s License and [ID reading](#) OCR technology capable of reading all fifty US states and over forty countries. CSSN software solutions are widely used among a variety of industries such as Healthcare, Security, Hospitality, and Government.
